

# Find the Flowers

Student Name: \_\_\_\_\_

Great Smoky Mountains National Park is a favorite destination for wildflower enthusiasts.

Park visitors come from all over the country to the park to see the wildflowers in bloom! The park has over 1,600 flowering species, many of these species are not found anywhere else in the world. Before completing the activity below, take a moment to get inspiration from this [video of wildflowers](#) in our Great Smoky Mountains!

## Directions:

### *Flower Scavenger Hunt*

Explore outside with an adult to see how many of these you can find ( DO NOT pick):

- A flower with petals bigger than a baby fingernail
- A flower with 3 petals
- A plant with many flowers on one stalk
- A plant with a single flower on a stalk
- A white flower
- A yellow flower
- A flower that has a sweet smell
- A flower with no smell
- A flower with an insect on it
